Introduction

Machine learning: computer program with capability of automatic improvement through experience.

Machine learning groups:

1. Artificial Neural Networks (Minsky and Papert, 1969; Michie et al., 1994; MacKay, 2005);
2. Decision trees (Mitchell, 1997; Simard et al., 2000; Roberts et al., 2002);
3. Statistical Classifiers (Michel and Deza, 2016);
4. Self-Organizing Maps (Kohonen, 1989; Haykin, 1999);

Objective of this work

A Comparison of
Machine Learning
Processes for
Classification of
Rock Units Using
Well Log Data

Carreira,V.R.

Geophysical problem: Identify rocks from well log data by means of machine learning and statisticas classifiers;

Way to solve it: use self-organizing map (SOM) and two statistical classifiers;

Strategy: Compare the results for the three explored methods, Kohonen (SOM), euclidean and mahalanobean classifiers for a synthetic scenarium.
